## COLDFIX:

### Cold Application, Flowable, Compaction Free Ironwork Reinstatement, Overbanding & Crack Repair

**No compaction:** No damage to fresh mortar joints.

**Cold applied:** No 'hot works' complications or health & safety risks to public or operatives.

**Extremely quick:** No 'set up' time for equipment, no compaction process and minimal traffic management.

**No noise or smell:** Perfect for night works.

**Early return to traffic.**

Coldfix is a two-pack polymer modified bitumen binder for cold-pour into graded aggregate which adheres tenaciously to ironwork, asphalt and concrete creating an extremely durable void-free reinstatement with good skid resistance without the use of compaction equipment or boilers. Damage to fresh mortar beds caused by early compaction of asphalt is one of the major causes of ironwork failure.

Coldfix can also be used for overbanding and crack repair

Auto-mix cartridge and  
5Kg two-pack drum  
with pour spout

Two-pack mobile pump  
system for large  
volume application.

Ironwork reinstatement  
section shows void free  
aggregate contact  
skeleton.
