

VIATEC: UK Hotmark Thermoplastic Line Marking

Viatecs Hotmark is a range of pre-formed thermoplastic road and playground markings. Hotmark offers the extremely high performance traditionally associated with hot-applied thermoplastic materials but without the need for expensive capital equipment. Hotmark is simply placed in position and heated to melting point with a Viatec gas torch.

Hotmark is available in a wide variety of lines and signs (ranging from road safety to company logos) in a number of colours.
