Dimensions

650 x 550 x 80 mm (W x H x D)

Clever version: Allows user to finely control the signs operation and also collection about the speed of passing vehicles. This gives users the ability to use the Clever SID can collect both individual record data and binned data format. Clever SID is supplied with four batteries. Clever SID is set-up and controlled by a Palm Pilot device.

Palm pilot software: The 'Collect' software for the Palm OS is used to set-up and collect data from the sign. The software allows all attributes of the sign to be set and is extremely easy to use. All data file formats collected by the sign are directly compatible with VDA and VDA-pro.
